

Who We Are

Initially conceived in 2013, but founded formally in 2014, IMPACT Madagascar is a Malagasy non profit organization whose focus is Implementing and maintaining actions for environmental change.

Your IMPACT...

By volunteering at Madiromirafy, participants directly contribute to the protection of critically endangered lemur species and the restoration of vital forest habitat. Volunteer efforts support long-term ecological monitoring, inform conservation management decisions, and strengthen locally led conservation initiatives. In addition to field impact, volunteers help build lasting links between research, conservation practice, and community engagement in one of Madagascar's most ecologically important landscapes.

Madiromirafy Field Volunteer Programme

IMPACT MADAGASCAR

www.IMPACTmadagascar.org

IMPACT Madagascar offers a hands-on volunteering placement at our Madiromirafy site, focused on lemur conservation, habitat restoration, and community engagement. Volunteers assist with population surveys of critically endangered crowned sifakas (Propithecus coronatus) and red-brown lemurs (Eulemur rufus), while also observing a wide range of native and endemic species. Activities may include ecological restoration, reforestation, and occasional environmental education initiatives.

Duration: Minimum two weeks (May–December)

Accommodation: Volunteers stay at a modern forest camp with flush toilets, washing facilities, and shared living spaces, providing comfort while remaining immersed in the field environment.

Costs & Logistics:

- Programme fee: per person for two weeks; additional weeks at US$503 per person
- Bottled water recommended (US$1.17–2.35 per person/day)
- Airfare and travel to/from Antananarivo are the volunteer's responsibility

A local tree nursery - tree planting takes place between May & December.

Highlights:

- Observe critically endangered lemurs up close in their natural habitat
- Authentic immersion in Malagasy culture and daily life
- Comfortable forest camp accommodation
- Ideal for those interested in ecology, biology, or primatology seeking field experience

Our visitors center and volunteer lodge (left) constructed in 2023.
